

Concern Bellesbumprom

Bellesbumprom Concern unites about 60 entities which concentrate 70 per cent of wood processing in Belarus.

The logging sector includes: timber collection and removal, its cross-cutting, production of industrial wood and round timber, production of sawlog, raw materials for manufacturing, plywood, matches, technological raw material, collection of turpentine gum.

The pulp and paper industrial sector is specialised in production of cardboard and paper articles.

Over 20 types of paper and cardboard are produced.

The wood-processing and furniture sector is divided into two major branches closely interrelated: on the one hand, this is wood and products of wood which is the result of primary processing of wood raw materials and elements for furniture and instruction industries (windows, doors, sections, wallboards, etc.); on the other hand, this is furniture and this branch is directly faced to the end market.

The Concern is the largest manufacturer of furniture in the Republic of Belarus. The specific weight of furniture production of the Concern enterprises in the total furniture production in the Republic of Belarus is about 50 per cent.

The production programme of furniture manufacture is practically the whole assortment of household and office furniture.

The Concern has the widest relations at the foreign market and implements export- import independently. Meanwhile, the import-export potential of the industry is not covered in full.

That is why the Concern is interested in expansion and reinforcement of its relations with business partners from different countries of the world.

Co-operation with us is stability, reliability and prospects in development of our and your industries.
